

METADATA DRIVEN CUSTOMIZATION OF A SOFTWARE-IMPLEMENTED BUSINESS PROCESS

ABSTRACT OF THE DISCLOSURE

5 In a method of customizing a software-
implemented business process on a mobile computing
device, customized metadata defining customizations
of the business process are provided. Next, the
metadata is deployed to the mobile computing device
10 and stored in a data store of the mobile computing
device. The customizations defined by the metadata
are then applied to the software-implemented business
process.
